

Udit Das

COMPUTER SCIENCE STUDENT

Introduction

Hi, I am Udit Das from Guwahati, Mirza. I have been curious about computer science and tech since childhood. Currently, I am pursuing my degree in BCA (5th Sem). Web developer with a passion for building dynamic experience. From React/NextJS to FireBase. Currently working in a media company as an editor and building personal web applications also contributing to my dreams and hobby as an independent music producer/composer.

Project

TestTile

An interactive, single-page application that leverages the Google Gemini to instantly generate customized MCQ on any topic provided by the use <https://testtile.vercel.app/>

Conerge

Gemini, ChatGPT, Grok, Deepseek, MetaAi all in one place. Converge lets you compare how different AI personalities respond to the same prompt.

<https://converge-one.vercel.app/>

Remind App

I used to forget about my work/things so I build this. Very simple & very usefull with notification update & widget support. Made with Kotlin & JetpackCompose
